## SUMMARY

Experienced Full Stack enthusiast with a passion for customer satisfaction and a knack for overcoming challenges. Seeking opportunities to grow and excel as a Full Stack developer.

## EXPERIENCE

- 08/2021 - 07/2024

Delhi

Full Stack Developer

Tata Consultancy & Services

- Developed a web application utilizing NextJS as a full stack developer, ensuring seamless user experience and efficient functionality.
  - Translated UI designs from Figma dashboard into interactive user interfaces, maintaining design fidelity and usability.
  - Implemented security measures for API routes in Reltio and Cassie based systems, ensuring data protection. Integrated Spanish translation feature into the web application using i18next framework.
  - Designed and executed test scripts to validate the functionality and performance of the application. Authored detailed design documents outlining the architecture and functionality of the application, providing clear guidelines for development and future enhancements.
  - Implemented AWS Lambda function to automate the transfer of opt-out files from the landing S3 bucket to the refined bucket. Additionally, configured a Glue job to efficiently compile multiple files from the s3 bucket into a single cohesive file, streamlining data processing workflows.
- 05/2020 - 06/2020

Delhi

Front End Developer Intern

Anuation Research & Consulting LLP

- Worked on adding auto address field submission feature, recreated some forms and optimized the response time on details submission using React and added UI animation with particles.JS
